Art Unit: 2817

This application is in condition for allowance except for the following formal matters:

**Withdrawn Claims:**

In view of the indicated allowability of elected independent claim 1, the following action regarding the withdrawn claims has been taken:

Withdrawn claims 4, 5 have been rejoined with allowable elected claim 1 since they can properly depend from claim 1, as amended, and are also allowable in view of their dependency from allowed independent claim 1.

However, claims 3, 6-14 remain withdrawn since these claims correspond to embodiments which can not properly depend from claim 1, as amended. That is to say, amended claim 1 now requires "conductive joint members" which are of "a rectangular shape" and thus excludes embodiments of the invention not having rectangular shape conductive joint members. Note that the embodiments encompass by claims 3, 6-14 all disclose "conductive joint members" which are "balled shape", "barrel shape" or "cylindrical" and thus can not properly depend from "conductive joint members" which are of "rectangular shape".

Accordingly, claims 3, 6-14 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 27 March 2003.

Since this application is in condition for allowance except for the presence of withdrawn claims 3, 6-14, claims 3, 6-14 should now be cancelled.

**In the Claims:**

In claim 1, lines 5, 6, note that --respective-- should precede each occurrence of "contact" for a proper characterization; lines 6, 7, note that --corresponding-- should precede

Art Unit: 2817

each occurrence of "waveguide" for a proper characterization; line 11, note that --at least one-- should follow "said" for consistency with the earlier recitation thereof.

In claim 1, line 12 and claim 18, last line, note that "forming in" should be deleted as being unnecessary.

In claim 2, note that the phrase --said at least one electrically conductive joint member comprises-- should follow "wherein" for consistency of description and --which-- should precede "are" for clarity of description.

In claim 5, line 2, note that --plurality of-- should follow "said" for consistency of description.

In claims 15, 16, 17, line 2 of each claim, note that --at least one-- should follow "said" for consistency of description with the earlier recitation thereof.

In claim 15, line 2, note that "formed" should be rewritten as --comprised-- for a proper characterization.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1, 2, 4, 5, 15-17; 18 are allowable over the prior art of record.
